## Call for papers – Invitation to authors

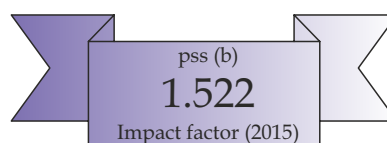

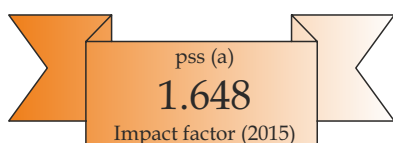

*Special issues in physica status solidi (a/b)  
Nitride Semiconductors (ICNS-12)*

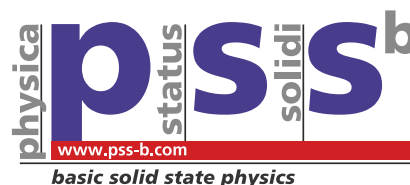

Guest Editors: Ferdinand Scholz, Ulrich Schwarz,  
Andrei Vescan, and Tim Wernicke

### Publish your ICNS-results in the special issues!

- Real journal publication – no proceedings
- Peer review process (2 reviewers per paper)
- Fast online publication after acceptance
- Completion of issues planned for Jan 2018

**Submission Deadline: July 28, 2017**

**physica status solidi (a/b)** will publish two special issues highlighting the most exciting new results presented at this year's **12th International Conference on Nitride Semiconductors (ICNS-12)**. In collaboration between the Guest Editors and the Editorial Office we cordially invite you to contribute a **Feature Article** (topical review, for invited speakers) or **Original Paper** manuscript based on or related to your presentation.

All submitted manuscripts will undergo **peer review** (two reviewers per paper). Papers are published in Wiley Online Library Early View **few weeks after acceptance**, your article is citable immediately. The print issues of pss (a) and (b) are planned for Jan 2018 when all articles are complete. The clustering of related articles **raises the visibility** of these articles significantly.

### Information on submissions:

Please direct your submission to

**pss (a) for optical and electronic devices:** [www.editorialmanager.com/pssa-journal](http://www.editorialmanager.com/pssa-journal)

**pss (b) for growth and basic physics:** [www.editorialmanager.com/pssb-journal](http://www.editorialmanager.com/pssb-journal)

Please mention the submission to the ICNS-12 special issues in your cover letter and select the appropriate section/category ICNS-12 – Nitride Semiconductors to expedite handling.

Please refer to the [Author Guidelines](#) available on our homepage [www.pss-journals.com](http://www.pss-journals.com)

**Original Papers** expose original and previously unpublished work of general interest to the community. Manuscripts do not have a strict length limit (typical lengths vary from 6 to 10 journal pages). Articles must fulfil the standards and requirements of the journal. Acceptance of a contribution for presentation at the conference does not automatically include publication in the topical section. Main criteria for consideration by pss (a/b) are:

- The importance, relevance, and novelty of the results
- The general quality of the manuscript (serial or incremental work is discouraged)
- Main results have not yet been published (also not in conference proceedings) and are not under consideration for publication elsewhere.
- Please make sure not to copy more than insignificant amounts of text from (even your own) previous publications. All manuscripts will be processed through the [iThenticate system](#).

### Further benefits for pss authors include:

- No page charges or publication costs for authors, free online colour
- Modern article formats (PDF, Enhanced PDF, HTML, Enhanced Article for mobile devices)
- Supporting information, e.g. additional data, videos or animations can be published online
- [Wiley OnlineOpen](#) option compliant with funder mandates and supported by many institutions
- Author suggestions for journal cover figures or frontispiece pages, especially for Feature Articles
- The article will be provided as electronic reprint on request
- Color print, journal issues, reprints with cover page, posters etc. are available for purchase
- pss is indexed in ISI Web of Science and all other major abstracting databases
